SMU was established to strengthen access to medical, technical and professional education in Sikkim and the neighbouring region. The University's arrangements for Sikkim-nominated students, including free 50 MBBS seats (Government of Sikkim seats) and tuition fee concessions, have provided an important mechanism for eligible students to pursue higher education.

Since its establishment, Sikkim Manipal University (SMU) has been committed to improving access to professional education for the people of Sikkim. The University has been providing 20% of seats to students from the state, along with a 75% tuition fee scholarship, making professional programmes such as Engineering, Medicine, Nursing, Allied Healthcare Professions, Management and Basic Science & Humanities and Social Sciences programmes more affordable for ordinary families at a time when the cost of such education was beyond the reach of many.

This initiative has played an important role in expanding educational opportunities and developing skilled human resources in Sikkim. To date, SMU has produced more than **2,600 engineers and 350 doctors from the state**, many of whom have contributed directly or indirectly to the state's economic growth and social development. By enabling local students to acquire professional qualifications and pursue career opportunities, SMU has contributed to strengthening the workforce, improving access to professional expertise and supporting the long-term socioeconomic progress of Sikkim.

4. Supporting Students to Continue and Complete Their Studies

SMU recognises that financial assistance alone may not be sufficient to ensure academic success. Students may also require academic guidance, additional teaching support and regular monitoring to overcome learning difficulties.

The University has the following academic support mechanisms:

4.1 Slow and Fast Learner Policy

The University's Slow and Fast Learner Policy provides a framework for identifying students who require additional academic support. Depending on their learning needs, support may include remedial or extra classes, tutorials, additional assignments and academic guidance.

These measures are intended to improve learning outcomes and help students progress successfully through their programmes.

Details for Slow and Fast Learner are mentioned in**: Annexture II**

4.2 Teacher Guardian Policy

Under the Teacher Guardian Policy, teachers monitor students' academic progress and provide guidance. The arrangement helps identify academic difficulties and other support needs at an early stage.

Together, these mechanisms support student engagement, academic progression and successful completion of studies. Their relevance to SDG 1 is strengthened when implementation records demonstrate how scholarship recipients or students from economically disadvantaged backgrounds benefit from these interventions.

5. Graduation and Completion Support for Students from Low-Income Backgrounds

The University supports student progression through financial assistance and academic support measures. SMU has established a specific graduation target of 100% for students belonging to the bottom 20% of household income.

SOP FOR

Slow And Fast Learner

(Identification & Activities)

Objective

The purpose of assessment of the learning levels of the students and conduction of activities for them are:

- Identification of the Slow learners and Fast learners in the class.
- To ensure that Slow learners and Fast learners are taken care as per their needs.
- To help them out for improvement in their academics

Introduction:

Regular classroom learning focuses on the acquisition of new skills based on previously learnt concepts. When many of the students are learning at a faster pace, a slow learner tends to be left behind.

This creates a knowledge gap among the slow and fast learners in basic concepts & skills and reduced comprehension ability across a wide spectrum of academic areas.

Slow learners are student with the ability to acquire all academic skills at a rate below than that of the average student. As a result of their inability to match the learning pace of their peers, they might consider themselves lesser than others which may affect their self-confidence and self-esteem.

Slow learners need extra support and if this support/ guidance is not provided, they often feel neglected and start resenting class. They develop a pessimistic attitude, which ultimately affects their academic performance.

On the other hand, Fast learners know a great deal about a variety of topics and have a quicker grasp and recollection of factual information than other students of the class. They can easily feel bored if they are not kept busy with challenging work.

Therefore, it is essential to maintain a positive attitude and offer support to both slow & fast learners to eliminate many factors that hinder learning, such as distractions, a fast classroom pace and a competitive atmosphere.

Identification of Slow and Fast Learner

1. After one month of teaching in case of First Semester/ First Year classes, subject teacher to conduct a Class Test/ Quiz and on the basis of marks obtained, students are classified as Slow and Fast Learner.
2. From Second Semester/ 2nd Year onwards Class Test/ Quiz, preceding exam performance, current subject performance and class observation need to be used to classify students in two groups: Fast learners and Slow learners. Based on preceding exam marks students can be classified as given in table below:

Category	**Preceding Exam Marks %**
Slow Learner	**Marks Percentage ≤ 45%**
Fast Learner	**Marks Percentage ≥ 45 %**

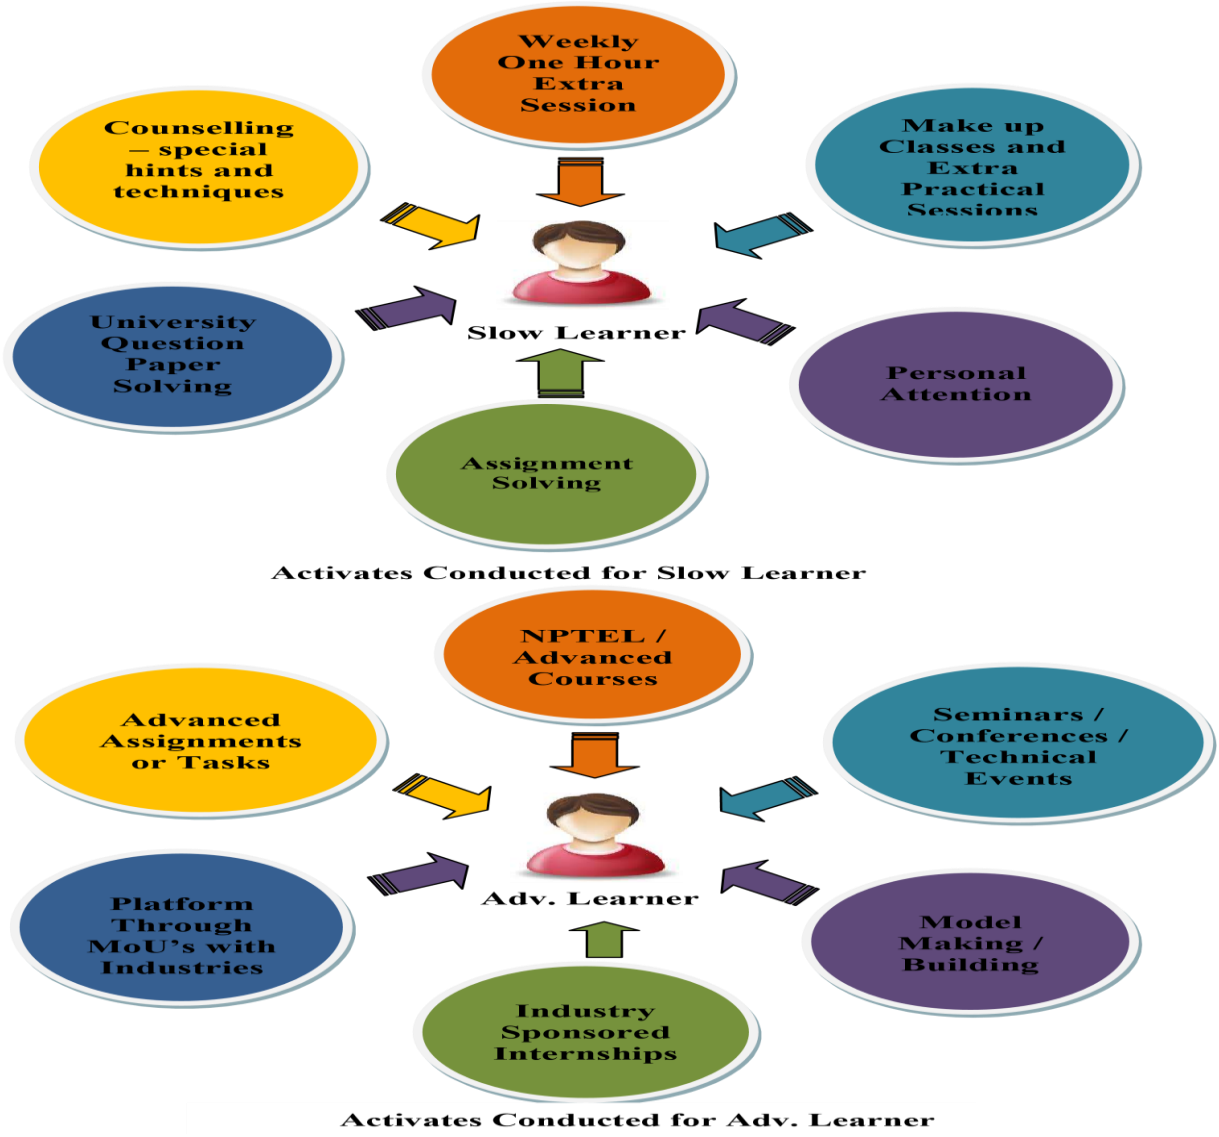

3. Slow learner and Fast learners would be identified for each subject separately by respective subject teacher for all the semesters/ year.

Activities to improve performance of Slow Learner

1. Provisions should be made in weekly timetable by adding extra one hour to conduct problem solving sessions /revision sessions/extra sessions.
2. Make up classes and practical sessions should be conducted.
3. Personal Attention should be provided by respective subject teacher in teaching Assignments and solving sample question papers.
4. Question bank sharing
5. Counselling on regular interval.
6. Encourage peer tutoring.
7. Encourage interaction and oral communication.

Activities Fast learners

1. Advanced assignments or tasks should be assigned to fast learners.
2. Encouragement to complete NPTEL/Advanced courses
3. Encouragement Participation in Seminars/Conferences/Technical Events
4. Assignment based on Model making/ building.
5. Group activity leader for assignment/ Project task.

SMU launches student mental health booklet Feel.Deal.Heal

SE Report

GANGTOK, June 25: In a major initiative toward promoting mental wellness, Sikkim Manipal University (SMU), in collaboration with the Department of Psychiatry at Sikkim Manipal Institute of Medical Sciences (SMIMS), launched a comprehensive student mental health booklet titled Feel.Deal. Heal today.

The booklet aims to serve as a practical and accessible guide for students to understand, process, and manage common mental health challenges, informs a press release.

It covers early signs of stress, anxiety, depression, and burnout while offering coping strategies based on principles of mindfulness and Acceptance and Commitment Therapy (ACT). It also lists professional mental health resources available both on and off campus.

Co-authored by Dr. Harshavardhan and Dr. Geeta Soohinda, associate professors in the Department of Psychiatry, SMIMS, the booklet will be freely accessible to students, staff, and the general public through the official SMU website.

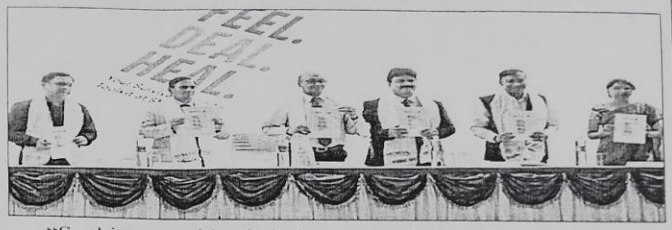

Copies will also be distributed via campus wellness centers and academic departments.

The launch event was held at the SMIMS campus and was formally inaugurated by AVM (Dr.) Dilip Chandra Agarwal, VSM (Retd), vice chancellor of SMU.

Addressing the gathering, Dr. Agarwal underlined the importance of emotional well-being in academic life: "At Sikkim Manipal University, we've always believed that real education goes beyond lectures and exams. It's about developing resilience, empathy, and wisdom.

The Feel.Deal.Heal. guide is more than a resource—it's a reminder that emotional well-being is as essential as academic success," he added.

SMIMS pro vice chancellor and dean Dr. Muralidhar V. Pai echoed this sentiment, urging students to seek help without hesitation.

"Seeking psychiatric help is a sign of strength, not weakness. This booklet is a heartfelt effort to walk with students on their mental health journey, offering strategies rooted in science to build resilience and stay connected to what truly matters."

Department of Psychiatry head Prof. (Dr.) Sanjiba Dutta highlighted the alignment of the initiative with University Grants Commission (UGC) directives on student mental health and the institute's role in supporting student well-being.

In her address, co-author Dr. Geeta Soohinda highlighted the need to promote a culture of holistic well-being. She also spoke on the key themes of the booklet, especially interpersonal issues, and included important helpline numbers for mental health support.

The event also saw participation from senior university officials, including registrar Prof. (Dr.) Karma Sonam Sherpa, SMIT director Dr. G.L. Sharma, COO (CRH) Subhendu Prakash, and deputy medical superintendent Dr. Mohonish N. Chettri. Undergraduate students contributed creative expressions in a poster competition on the theme 'Strong Minds, Open Hearts, Connected Campus.'

Earlier, the vice chancellor inaugurated the newly extended wing of the Psychiatry Outpatient Department (OPD) at SMIMS.

Dr. Sanjiba Dutta noted that the expanded facility was designed to improve patient handling and maintain confidentiality, keeping pace with rising awareness and demand for mental health care.

Importantly, Dr. Dutta also announced that the department is in the process of introducing Repetitive Transcranial Magnetic Stimulation (rTMS)—a non-invasive treatment for psychiatric disorders.

Once operational, SMIMS will be the first hospital in the entire Northeast region to offer this cutting-edge therapy.

These twin initiatives mark a substantial step in SMU's broader commitment to building a healthier, more compassionate academic environment while simultaneously strengthening mental health infrastructure in the region, the release mentions.

Subject : Creating a health and tobacco free environment in Educational Institutions

Respected Madam/Sir,

As you are aware, tobacco control has been one of the high priorities of the Government of India. UGC has been issuing letters to all the HEIs to take steps for both prevention of initiation of tobacco use among the youth and providing cessation services. Cigarettes and Other Tobacco Products Act (COTPA)-2003 contains specific provision to discourage tobacco use among youth, such as ban on smoking in public places in higher educational institutions and prohibition of sales of tobacco products within 100 yards of any educational institutions.

You may also be aware that Ministry of Health and Family Welfare, Government of India have notified the guidelines for Tobacco Free Educational Institution containing measures for tobacco control and role and responsibilities of Educational Institutions to achieve the objective of creating tobacco free environment. These guidelines are available on https://ntcp.nhp.gov.in/assets/document/TEFI-Guidelines.pdf.

It is important that all possible measures are taken to curb the use of tobacco and create awareness about harms due to tobacco use. All HEIs are requested to take appropriate action/measures to create awareness among students on the harmful effects of tobacco use which shall lead to realize the goal of creating a healthy and tobacco free environment in educational institutions.

With kind regards,

Yours sincerely,

SOP FOR

Slow And Fast Learner

(Identification & Activities)

Objective

The purpose of assessment of the learning levels of the students and conduction of activities for them are:

- Identification of the Slow learners and Fast learners in the class.
- To ensure that Slow learners and Fast learners are taken care as per their needs.
- To help them out for improvement in their academics

Introduction:

Regular classroom learning focuses on the acquisition of new skills based on previously learnt concepts. When many of the students are learning at a faster pace, a slow learner tends to be left behind.

This creates a knowledge gap among the slow and fast learners in basic concepts & skills and reduced comprehension ability across a wide spectrum of academic areas.

Slow learners are student with the ability to acquire all academic skills at a rate below than that of the average student. As a result of their inability to match the learning pace of their peers, they might consider themselves lesser than others which may affect their self-confidence and self-esteem.

Slow learners need extra support and if this support/ guidance is not provided, they often feel neglected and start resenting class. They develop a pessimistic attitude, which ultimately affects their academic performance.

On the other hand, Fast learners know a great deal about a variety of topics and have a quicker grasp and recollection of factual information than other students of the class. They can easily feel bored if they are not kept busy with challenging work.

Therefore, it is essential to maintain a positive attitude and offer support to both slow & fast learners to eliminate many factors that hinder learning, such as distractions, a fast classroom pace and a competitive atmosphere.

Based on preceding exam marks students can be classified as given in table below:

Category	Preceding Exam Marks %
Slow Learner	**Marks Percentage ≤ 45%**
Fast Learner	**Marks Percentage ≥ 45 %**

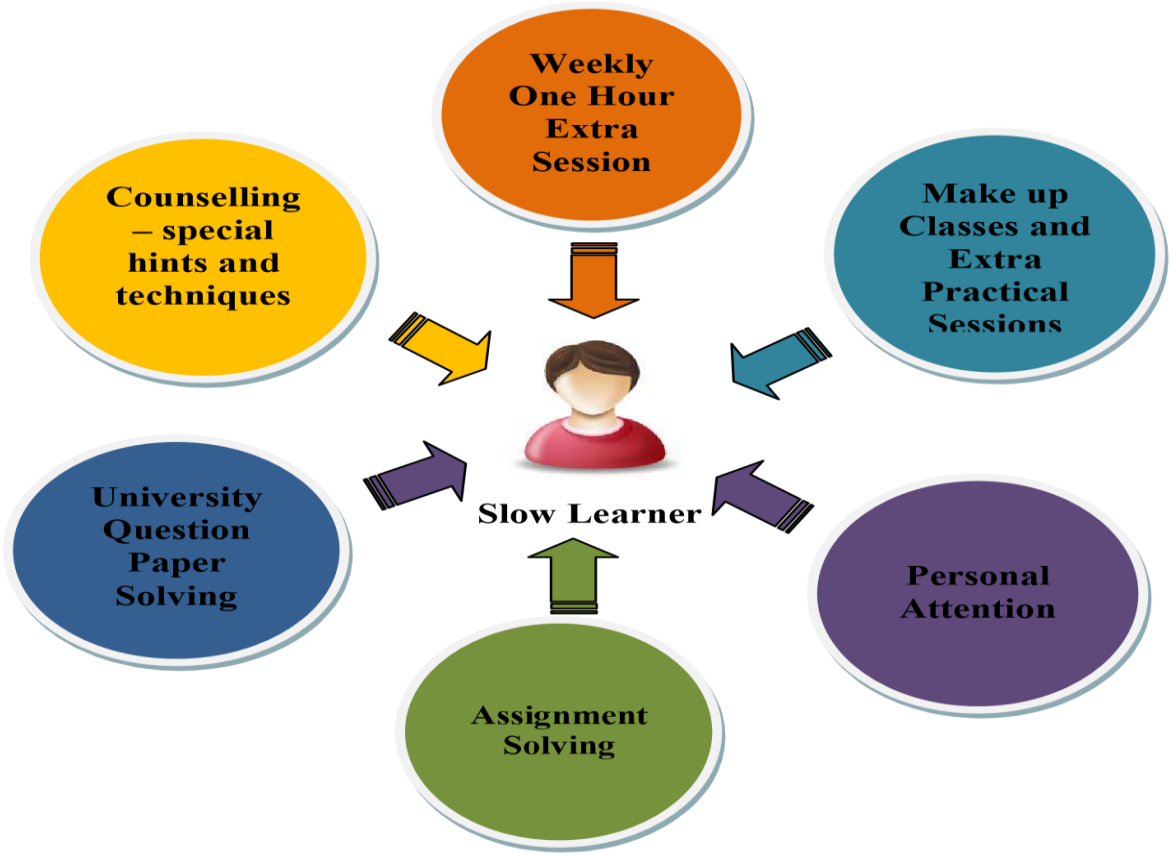

6. Slow learner and Fast learners would be identified for each subject separately by respective subject teacher for all the semesters/ year.
